### Understanding The Alloys Of Aluminum - AlcoTec

The first point to recognize, after understanding the identification system, is that there are two distinctly different types of aluminum within the series mentioned above. These are the Heat Treatable Aluminum alloys (those which can gain strength through the addition of heat) and the Non-Heat Treatable Aluminum alloys.

### Aluminum Extrusion Process and Extrusion

#### Terminology

Aluminum Extrusion Process Extrusion Defined.

Extrusion is defined as the process of shaping material, such as aluminum, by forcing it to flow through a shaped opening in a die. Extruded material emerges as an elongated piece with the same profile as the die opening.
