[Progressive Lenses - Why They're Better Than Bifocals](#)
Progressive lenses are no-line multifocal eyeglass lenses that look exactly the same as single vision lenses. In other words, progressive lenses will help you see clearly at all distances without those annoying (and age-defining) "bifocal lines" that are visible bifocals and trifocals.

[Bifocal & Progressive Lenses - coolwinks](#)

3. Are progressive lenses better than bifocal lenses? While bifocal lenses provide vision only for near and far distances, progressive lenses are more advanced as they provide seamless vision for three distances- near, intermediate and far. 4. Are progressive glasses lenses worth the money? Progressive lenses are worth investing in.

[Bifocal Glasses, Progressive Lenses And Readers: Q&A](#)

A: I assume you are referring to Zeiss progressive addition lenses. There are a number of very high-quality brands of progressives available to patients who need bifocals, Zeiss being one of them. Progressives, in my opinion (as both a prescriber and a wearer!), offer much more natural and usable vision than bifocals or trifocals.
