Only Square D style circuit breakers fit in a Square D style panel box. Square D circuit breakers and panels use a square with a capital D inside as an identification marker. Three wires enter a residential Square D service panel from the electric meter; two 120-volt hot wires and a neutral. These wires connect to bus bars. A fourth bus bar connects to a wire that grounds the panel's case to earth. A bonding band ties the ground and neutral bus bars together.

#### Square D electrical panels: pros, cons and costs

To comply with the National Electrical Code (NEPA 70), fuse boxes must be rated for a minimum of 100 amps. But larger residential current usage is becoming more common, so you should ensure the new panel meets or exceeds this level. The cost of electric panels varies based on type and size. A 220V circuit panel with six slots will cost you about \$30, while a unit with 30 slots will set you back \$185. Prices for Square D panels range between these limits.
