[Types of Butterfly Valves | Garlock](#)

Garlock only offers wafer and lug type valves; the bolt torques are the same for both types. Flanged. Has a flange face on both sides of the valve. Popular in the very large size valves. Some companies use a U shaped valve this is cheaper; but the two flanges are not always parallel, which

can cause problems with bolting against the pipe flanges. Garlock does not offer this type of valve. Welded. Used for very-high-pressure applications.

#### **Butterfly valve - Wikipedia**

A lug-style butterfly valve used in dead end service generally has a reduced pressure rating. For example, a lug-style butterfly valve mounted between two flanges has a 1,000 kPa (150 psi) pressure rating. The same valve mounted with one flange, in dead end service, has a 520 kPa (75 psi) rating.
