A pressure balance shower valve can provide even temperature to a tub or shower valve despite fluctuations that occur from water usage elsewhere.

[Pressure-balanced valve - Wikipedia](#)

A pressure-balanced valve provides water at nearly constant temperature to a shower or bathtub, despite pressure fluctuations in either the hot or cold supply lines. If, for example, someone flushes a toilet while the shower is in use, the fixture suddenly draws a significant amount of cold water from the common supply line, causing a pressure drop.
