[Do Car Solar Battery Chargers Work? - Lifewire](#)
Solar battery chargers do work, so long as you don't expect them to be something that they aren't. Unlike regular battery chargers that often have multiple amperage settings, solar battery chargers typically put out a very small amount of current that is more useful in maintaining a charge than charging a dead battery.

[Solar Battery Charging - Instructables](#)

The 1.2V battery on its own will not be enough to light the LED. The 2-3V solar panel will also have a lot of trouble lighting the LED by itself. We can attempt to use the voltage of the battery PLUS the voltage of the solar panel to operate the LED. Below is the solderless version.
